

# 037 - Technical Sale Sheet: Quadplex Web Slings

**Materials:** Polyester

**Standards:** EN1492 - 1:2000

Quadplex slings are usually made from polyester and are designed to lift VERY HEAVY LOADS.

Made up of 4 ply of high tenacity polyester webbing sewn together which give a very strong but flexible sling. Slings can be sewn side by side to increase load capacity and load area further. Multi lifting points can be added but a reduction in capacity is likely on any additional eyes.

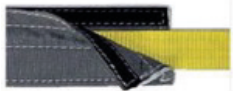

### Product Features

- 10,000kgs & over colour coded orange
- Slings have a Safety Factor of 7:1 *(unless a calculated lift)*
- Low weight to strength ratio compared to chain or wire slings
- Absorbs energy of sudden loading
- Wear sleeves available in various lengths & widths
