

FALLSOFT™

SAFETY EQUIPMENT 2024

Innovation since 1989

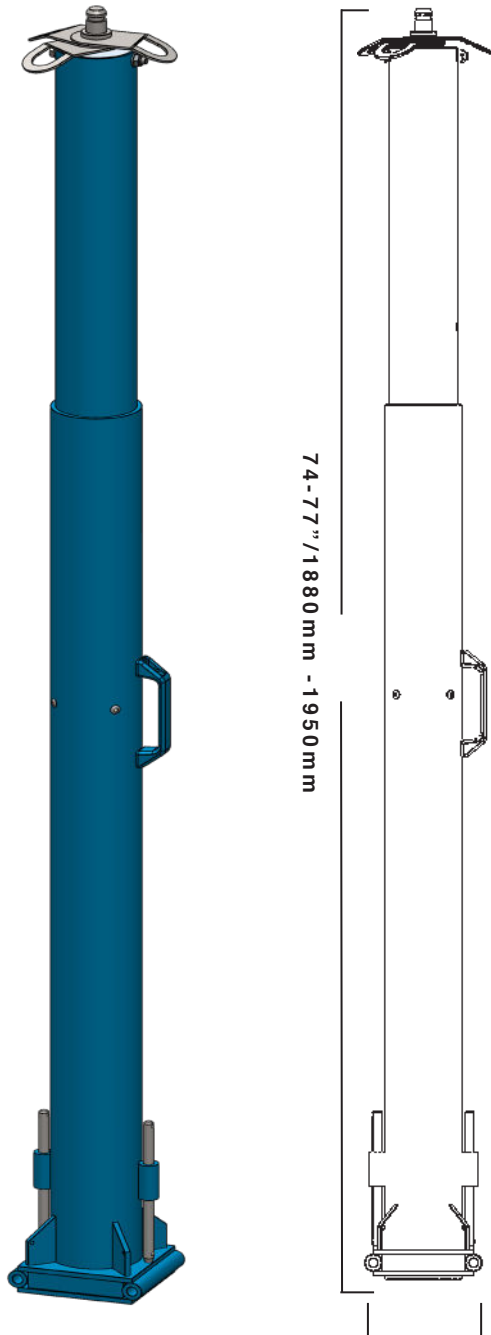

- 
- Introduction to Fallsoft
 - GM200A
 - Base plates
 - Winch mounts
 - Retrieval and rescue applications
 - Customs applications

- **FALLSOFT™** is a totally unique product designed to provide a safe fall protection system. It adapts to a variety of application from Utility Transformers, Circuit Breakers & Switches to a standalone anchorage for general industry and construction.
- The product was originally design by GD Mackay Co Ltd and sold under the brand of FallSoft. Safehold acquired the rights to the product in 2022 after the passing of George MacKay. With over 40 years in the industry, MacKay was the founder of Uni-Hoist, Fall Soft and the GD MacKay Co Ltd, as well as a pioneer in the confined space fall protection market.

FALLSOFT™ - 3 Person Tie off Post

Product Code: GM-200A

Max. Width 8 1/2" / 2100mm

Product Features

- Top anchor swivel allows for 360° degree use.
- Locks into anchor base plates with 2 locking pins.
- Lightweight Aluminium construction.
- Simple to inspect and maintain.
- Tie-off post has built-in shock absorbing features.
- Vertical structure does not rotate when used.
- Comes with carry handle.
- Hardware: grade 5 steel zinc plated.
- Optional 16"/30" (40.8 cm / 76.5 cm) davit arm on request.
- User friendly.

Product Specification

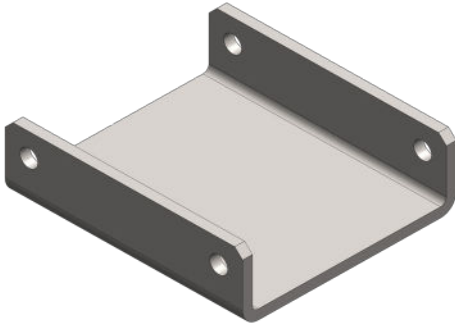

- Three users capacity.
- Maximum working load: 350lbs/159Kg per person.
- Weight 26lbs/11.7Kg.
- Max. arrest force rating of SRL or tear-out shock absorbers 900lb/4kN - 1350lb/6kN.
- Must be used with a full body harness.
- Support structure must withstand load

(Adapter Base. Mounts to existing GM136 Uni-Hoist style Base Plate so the GM200A Tie Off Mast can be used. Can be removed after use. Galvanized mild steel)

FALLSOFT™ - Base Plates

Product Code: GM-135/135CP/135CA/ 136 & GM138

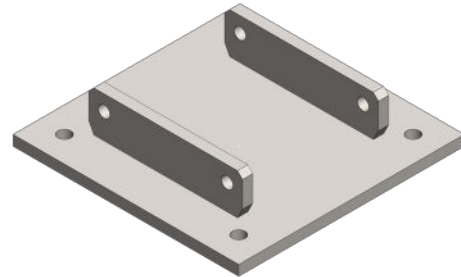

Model: GM135 For use on transformers.

Double pin style plate that is welded to top surface of transformer for permanent mounting

Dimensions: 6 3/4 " x 7 1/2" / 172mm x 192mm

Weight: 6.8lbs / 3.1Kg

Product Code: 40008

Model: GM135CP For use on transformers.

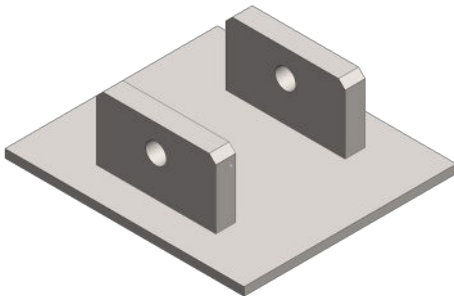

Double pin style plate that fits Waukesha Power transformers.

Bolted down to existing 1"(2.5cm) studs & may be removed after use.

Dimensions: 11" x 11" / 280mm x 280mm

Weight: 21.2lbs / 9.6Kg

Product Code: 40009

Model: GM136 For use on transformers.

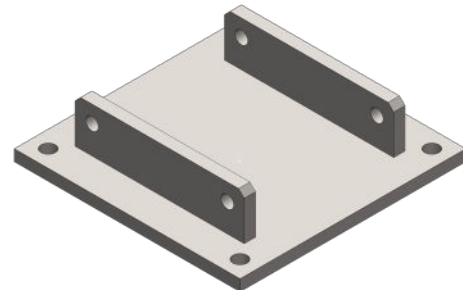

Uni-Hoist style (UH4000-2) weld on plate that is welded to top surface of transformer for permanent mounting.

Some Pennsylvania Power Transformers have the 2 mounting lugs welded to the top plate.

Dimensions: 8" x 9" / 205mm x 230mm

Weight: 11lbs / 5Kg

Product Code: 40010

Model: GM138 For use on Transformers.

Double pin style plate that is bolted to top surface of transformers. Has a galvanised protection finish.

Can also be used for direct connection to concrete or steel subject to engineering verifications on pull out calculations.

Dimensions: 10" x 10" / 254mm x 254mm

Weight: 18.2lbs / 8.3Kg

Product Code: 40011

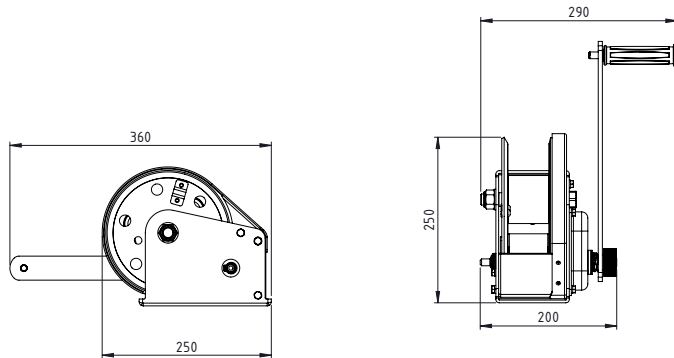

FALLSOFT™ - Boom Arm and Winches

Product Code: GM-193 Boom Arm Kit

Model: GM193 Boom Arm

Retrieval Boom Arm with variable offset positions:

16", 20", 25" & 30". Comes with mounting bracket for connection of winch or SRL. Rotates 360 degrees around the GM200A Tie Off Mast.

Model: GM193 Boom Arm Winch Kit A

Includes:

Personel Winch and mounting bracket to bit the GM 193 Boom Arm. Options of 60ft and 100ft in Galvansied Steel, Stainless Steel and UHMPE Syntheic Rope.

Model: GM193 Boom Arm Winch Kit B

Includes:

SRLR and mounting bracket to bit the GM 193 Boom Arm. Options of 60ft and 100ft in Galvanized Steel.

Model:
GM193 Boom Arm
& GM200A

Custom winch mounting brackets can be designed and fabricated to suit other manufacturers of winches and SRL's

Safehold - Rescue Stretcher

Product Code: 40240

Product Features

- Robust compact and lightweight design
- Flexible and smooth material allows a casualty to be easily slid on or off.
- Stretcher can easily slid over surfaces.
- Webbing passes through the stretcher allowing the stretcher to freely slide without damaging the webbing.
- Multiple strong handles allow multiple rescue workers to manoeuvre the stretcher at the same time.
- Stretcher can be hauled horizontally and vertically
- Lifting strops allow the stretcher to mould around the casualty.
- RFID options available

Product Specification

- User capacity: 400kg (880 lbs)
- Kit weight: 10kg (22lbs)
- Single user

Safehold - Rope Access Harness

Product Code: 32020/32021/32022

Product Features

- Advanced ergonomic design
- Breathable perforated padding
- Breakaway lanyard park loops
- Forged alloy hardware
- Alloy quick connectors
- Narrow webbing on shoulders
- Front ventral attachment
- Front sternum attachment
- Removable chest ascender
- Swing seat attachment loops
- Rear D fall arrest attachment
- Rear tool hanging point
- 2 x belt work positioning D's
- 6 x semi-rigid gear loops
- Leg height adjustment
- Rear vertical adjustment
- RFID options available

Product Specification

- User capacity: 140kg (310lbs)
- Meets EN361:2002, EN358:2018, EN813 & ANSI Z359.11
- Harness weight: 2.3kg (5lbs)
- Connector material: EDC coated steel
- Webbing material: polyester
